EXAMPLE OF RESIDENTIAL DEVELOPMENT OVERLYING CERCLIS SITE.pptx

Alex:

Attached is one more figure. I did this some time ago by copying an image w/ the picture tool from Google. This isn't from the ArcGIS project.

Can you re do this with a better resolution figure?

This subdivision is located in the nw corner of the WR Grace/Bonnie Lake Mine. The name of the subdivision is Eaglebrook.

Thanks,
Brad Jackson

Brad:

Here is the requested information you request from the Florida Background Gamma dataset.

Minimum: 5

Maximum: 12.1

Mean: 6.694979

Standard Deviation: 0.997054

Alex:

You prepared a map of some background radiation data. Do you have the data in a spread sheet format so that you could calculate the mean background concentration and the standard deviation?

Brad:

This is an initial map that I envision giving to you as a layer for the laptop. The break points differ just a bit from the survey points results map .

I personally think it provides a better picture of the overall results.

Alex
